

National Library for Public Health e-Newsletter

July 2010

Welcome to the July edition of the [National Library for Public Health](#) newsletter.

The purpose of this newsletter is to highlight new additions to the library and any special pieces of work we have done.

We hope you find this useful and would welcome any comments. If you would like to be added or removed from our mailing list, please email library@nepho.org.uk. Please note, due to the volume of emails received for subscriptions, you **will not** receive a confirmation.

Available now... Annual Evidence Update on Drugs Misuse

The theme for this update is *Drugs misuse treatment in offender populations*. This year, as well as identifying a number of new guidelines and key policy documents, there is a focus on treatments for female offenders. The Library has teamed up with experts in the field of drugs addiction to evaluate the evidence. The update can be found at <http://bit.ly/bv6aps>

NHS Evidence survey on accessing medicines information

NHS Evidence, a service provided by National Institute for Health and Clinical Excellence (NICE), would like you to take part in a short survey to find out more about your experience of accessing information on medicines. It will only take up to 5 minutes to complete.

The information collected through this survey will help to understand what type of information on medicines you find useful and how this information is used.

This information will help us to understand how access to relevant medicines information can be enhanced through NHS Evidence, including the availability of features specific to improving access to information, for example, through alerts, wikis or communities of interest. This survey is being conducted by Tribal, an independent research company, on behalf of NHS Evidence. Your responses are kept secure, will be completely confidential and will not be linked back to you in any way.

Please click on the link to complete the survey: <http://surveys.viewscout.com/vc/medicalinformationsurvey>

- [Marmot calls for fairness to diminish health inequalities](#) NHS Confederation, 23rd June

The library has been developed to provide high quality evidence e-based information on all aspects of public health.

It is designed for those working in the field of public health by providing a single source of access to web based evidence on public health. It is being developed as part of the Department of Health Information and Intelligence Strategy by the North East Public Health Observatory. It replaces the Public Health Electronic Library (PHeL).

The National Library for Public Health does not contain
