

National Library for Public Health e-Newsletter

October
2010

Welcome to the October edition of the [National Library for Public Health](#) newsletter. We are also on Twitter, follow us or get in touch at [@NLPHEngland](#)

The purpose of this newsletter is to highlight new additions to the library and any special pieces of work we have done. We hope you find this useful and would welcome any comments. We are now using mailing list software to manage and maintain our contacts. If you would like to be added or removed from our mailing list, please visit [our mailing list manager](#).

The library has been developed to provide high quality evidence e-based information on all aspects of public health.

New sub-collections - Climate Change and Housing

We are constantly adding new resources to the NLPH as well as systematically adding new sub-collections. We have just added a number of resources to two new topic areas - [climate change](#) and [housing](#) - many of which are cited below.

It is designed for those working in the field of public health by providing a single source of access to web based evidence on public health. It is being developed as part of the Department of Health Information and Intelligence Strategy by the North East Public Health Observatory. It replaces the Public Health Electronic Library (PHEL).

Consultations

Consultations on a number of public health topics are currently being run. Further details can be found via the link below:
