

ISSUES FOR THE WORKSHOPS

- 1. WHAT DO YOU UNDERSTAND A 'POPULATION HEALTH OBSERVATORY' TO BE?**
- 2. INFORMATION AND FUNCTIONS**
 - 2.1 What information do you think should be included in the observatory?**
 - 2.2 Should the observatory include only numerical data or should it include qualitative data as well?**
 - 2.3 How could an observatory best support existing health information agencies?**
- 3. LOCAL/REGIONAL/NATIONAL INFORMATION NEEDS**
 - 3.1 How could an observatory help support local/regional/national information agencies?**
 - 3.2 What are the potential benefits and challenges associated with developing an observatory on an all-island basis?**
- 4. PARTNERS AND RELATIONSHIPS**
 - 4.1 Who would be the observatory's partners and how should the observatory organise its relationships with them?**
- 5. MANAGEMENT AND GOVERNANCE**
 - 5.1 How should the observatory be managed?**
 - 5.2 What governance arrangements should underpin the observatory?**
