

Aim - to help meet the information needs of a range of different users working to improve health and reduce inequalities

There is a range of different tables (of pre-defined indicators and datasheets) together with online tools to analyse and display them.

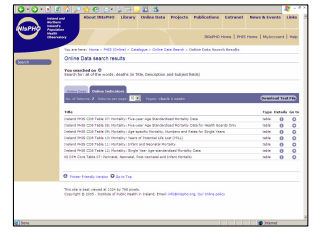

Search for tables and datasets

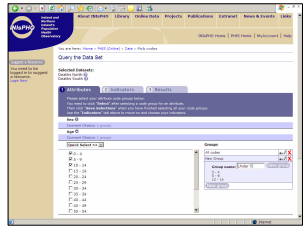

INI'sPHO (Online) Data

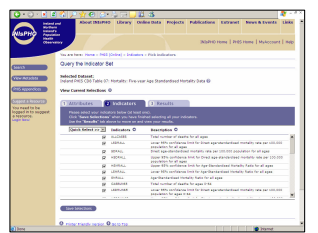

Go to tables

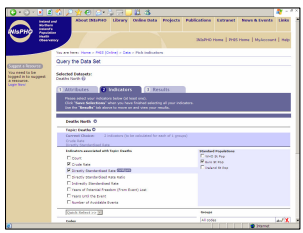

Go to datasets - form sub groups

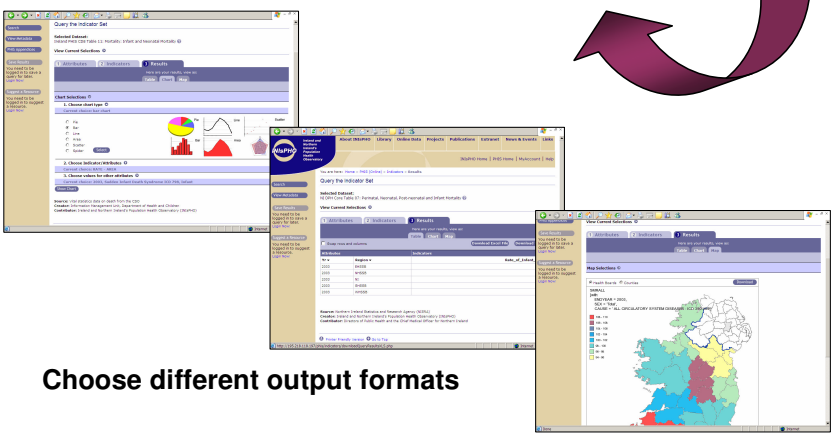

Select rows and indicators

Select your own indicators and then form your aggregated dataset

Choose different output formats

Data came online in the following phases

Phase 1 – Ireland PHIS CD and NI DPH core tables

Phase 2 – Other tables from WHO, National Suicide and Parasuicide rates, hospital data sets, Social Capital surveys, more user-defined indicators (November 2006)

Coming soon – more survey data, HIPE data, updated mortality data, WHO data, etc
