

National Library for Public Health e-Newsletter

September
2010

Welcome to the September edition of the [National Library for Public Health](#) newsletter. We are also on Twitter, follow us or get in touch at [@NLPHEngland](#)

The purpose of this newsletter is to highlight new additions to the library and any special pieces of work we have done. We hope you find this useful and would welcome any comments. If you would like to be added or removed from our mailing list, please email library@nepho.org.uk. Please note, due to the volume of emails received for subscriptions, you **will not** receive a confirmation.

The library has been developed to provide high quality evidence e-based information on all aspects of public health.

Local Alcohol Profiles for England (LAPE 2010)

The Local Alcohol Profiles for England (LAPE 2010) were released on 01 September by the North West Public Health Observatory (NWPHO), based in the Centre for Public Health at Liverpool John Moores University.

The profiles contain 23 alcohol-related indicators for every local authority and 24 for every primary care trust in England. This year, key indicators in healthcare, criminal justice, benefits claimants, drinking patterns and life lost due to alcohol have been used in combination to identify and map those areas experiencing different overall levels of alcohol-related harms. View the profiles at <http://www.nwph.net/alcohol/lape/>

It is designed for those working in the field of public health by providing a single source of access to web based evidence on public health. It is being developed as part of the Department of Health Information and Intelligence Strategy by the North East Public Health Observatory. It replaces the Public Health Electronic Library (PHeL).
